WORK EXPERIENCE

Check out my portfolio at <https://patrykreba.com>

Senior React.js Developer 10.2022 - present | Plan Software / Voith

- Worked on **Large-Scale, Multi-Language E-Commerce Store**.
- Collaborated with businesses to enhance UI/UX, improving user experience and website effectiveness.
- **Transitioned from Bootstrap to Tailwind CSS**, adopting a more streamlined and flexible design approach. Standardized site design through the creation of a style guide and Storybook, utilizing Tailwind CSS and **Atomic Design principles**, ensuring consistent sizing, spacing, and typography.
- Rapidly reduced frontend development backlog, enabling the team to catch up within two sprints after joining.
- Aligned UI/UX designs using tools like **StoryBook and Figma**, coordinating with backend developers for smooth integration.
- Tested and ensured reusable components functionality, **cleaned up legacy code** and avoided technical debt during the redesign process, meeting all user story acceptance criteria.
- Integrated analytics tool to track events on the website.
- **Improved overall workflow** and communication by proposing developers join business meetings.
- **Wrote a blog article** "[Angular vs. React? Which technology is more stable for larger enterprises?](#)".

Senior Frontend Developer 05.2021-10.2022 | HCL Technologies

- Working on a **global project** - cloud-based telemetry and analytics platform that aggregates critical data from devices and applications: **adding new components, code reviewing, and debugging**.
- **Leading technical interviews** for job candidates.
- **Mentoring** new employees.

Lead React Developer 08.2021-01.2023 | Fintech Project

- Co-creating, designing, and **planning the architecture** of a fully responsive web application
- **Building multi-layer forms** and managing the global state across a big codebase with **dynamic responsive UI** and complex validation with **Formik and Material UI**

Entrepreneur 05.2021 - 10.2022 | CLIMBIUM Patryk Reba

- Building, designing, and managing **e-commerce website CLIMBIUM.PL**
- **Shipping and Payments integration**
- Creating a brand, designing Logo and Label for product
- Supply chain organizing

Frontend Engineer 2016-2021 | INST-ECO

- **Building and managing the company website**

PERSONAL PROJECTS

PROFILE

Frontend Engineer
passionate about building
things in React JS ready to
develop apps in cooperation
with a creative and
ambitious team.

EDUCATION

Wrocław University of
Science and Technology
(2014-2019)

Engineer's degree

LANGUAGES

- English C1
- Polish: Native

INTERESTS

- Science and Technology
- AI, ML, Web3,
- Self-development
- Sports
- Traveling

SOFT SKILLS

- Creativity
- Infinite curiosity
- Teamwork
- Determination
- Hard working
- Openness
- Optimistic attitude
- Leadership

I also consent to processing
of my personal data
for the purposes of any future
recruitment processes.

🔗 PERSONAL PROJECTS

Reba AI - Generate & edit images with AI

- Secure access with robust registration, login, and route protection.
- **Interact with Alice, the GPT-4 powered chat assistant**, for instant support and guidance.
- **Generate new images with text prompts using Dall-E AI** creativity.
- Find images quickly with advanced search by content or objects.
- Revive old or damaged images with the restoration feature.
- Customize images by replacing objects with desired colors.
- Fill in missing areas of images seamlessly. Remove unwanted objects with precision.
- Extract objects from backgrounds easily.
- Download and share AI-transformed images conveniently.
- View details of each transformation process.
- Manage transformations with options to delete and update.
- Use credits to access image transformations.
- Access transformed images and credits on the profile page. Buy credits securely via Stripe.
- Enjoy a seamless experience across all devices and switch between light and dark modes as per preference.
- **Next.js** • MongoDB • TypeScript • **Dall-E** • **GPT-4** • TailwindCSS • Clerk • Cloudinary • Stripe • Shadcn • React Hook Form

Twitter Clone - "Twitter" is outdated name of X

- Users can Tweet and add comments
- Login authentication with Twitter API using NextAuth
- Ability to BAN a tweet via the Sanity Platform
- Next.js
- Sanity CMS
- Tailwind CSS

Amazon Clone

- Checkout/payment page with stripe functionality
- React context API
- Login Page with full login functionality (sign up and sign in) with firebase authentication
- Cloud function to process payment (serverless)
- Firebase for real time database
- Deployed LIVE on Firebase
- Stores orders for logged in user
- Geolocation
- Responsive Design

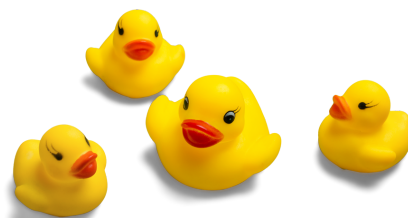

Next.js Invoices Dashboard

- A public home page.
- A login page
- Dashboard pages that are protected by authentication
- The ability for users to add, edit, and delete invoices.
- PostgreSQL database
- Tailwind CSS

Meme Generator - Elon Musk would be delighted!

Snake & Pacman games - because of sentiment

and more...
